

Egg Donor Financial Considerations

Agency Service Coordination Fee: \$3450.00

Our service coordination fee includes the complete cycle facilitation:

- Facilitating Matches with Intended Parents & Ovum Donor
- Preliminary Non-Medical Ovum Donor Screening
- Ovum Donor MMPI
- Case Management
- Trust Account Management
- Travel Coordination
- Collaboration with IVF Clinic
- Medical Appointment Arrangements
- Conference Call Between Intended Parents, Donor & Agency (Upon Request)
- Frequent Status Updates

Accident & Complication Insurance Policy: \$400.00 (One Time Premium)

This policy only covers the costs related to complications arising from the cycle medications and / or retrieval procedure. It covers both the ovum donor & recipient.

Legal Services Fee (Intended Parents): \$650.00

The Agency has made arrangements with a law firm specializing in third party reproduction arrangements to accept referrals from Happy Beginnings, LLC to represent our Intended Parents at a reduced rate of \$650 in the drafting and negotiations of the anonymous ovum donation agreement between the Ovum Donor and Intended Parents.

**Additional fees will apply for ovum donor's attorney.

**If the Intended Parents elect to utilize a different law firm any legal fees associated with the drafting and negotiating of the anonymous ovum donor agreement shall be the responsibility of the Intended Parents and shall be paid directly to the law firm selected by the Intended Parents.

Ovum Donor Compensation: \$3500.00 - \$10,000.00

This will depend on which ovum donor selected by Intended Parents. The ovum donor's requested compensation is listed in their profile general information section. Exceptional Donors or donors with rare ethnic backgrounds may request higher fees, although we do abide by the guidelines set forth by the American Society of Reproductive Medicine. The ASRM stipulates that compensation of donors in excess of \$5000.00 requires justification and sums above \$10,000.00 are inappropriate. We do not have any donors in our program with compensation requests exceeding \$10,000.00. This fee is to be placed in a trust account and paid according to the terms of the ovum donation agreement. Typically donors will receive \$750.00 upon starting injectable medications and the remainder upon completion of the retrieval procedure.

Local Donor Trust Account Deposit: \$1500.00

This is for ovum donor's residing within 100 miles of the primary IVF clinic. These funds are placed in a trust account set up with Happy Beginnings, LLC and distributed accordingly for ovum donor cycle related expenses. These fees include psychological evaluation & MMPI analysis, genetic counseling (if applicable), hotel, meal allowances, mileage, taxis, rental car, airfare, flight protection insurance, baggage check fees, childcare, parking, tolls, FedEx, express mail, donor's attorney fee and additional expenses as necessary for the donor's participation in the ovum donor cycle. Itemized expense statements and all receipts (as applicable) will be provided within sixty (60) days following the completion of the egg retrieval procedure. If any funds are remaining in the expense account at the completion of the donor cycle and after all bills are paid, the funds will be refunded to the Intended Parents.

Non-Local Donor Trust Account Deposit: \$4000.00

This is for ovum donor's residing more than 100 miles from the primary IVF clinic within the continental United States. These funds are placed in a trust account set up with Happy Beginnings, LLC and distributed accordingly for ovum donor cycle related expenses. These fees include psychological evaluation & MMPI analysis, genetic counseling (if applicable), hotel, meal allowances, mileage, taxis, rental car, airfare, flight protection insurance, baggage check fees, childcare, parking, tolls, FedEx, express mail, donor's attorney fee and additional expenses as necessary for the donor's participation in the ovum donor cycle. Itemized expense statements and all receipts (as applicable) will be provided within sixty (60) days following the completion of the egg retrieval procedure. If any funds are remaining in the expense account at the completion of the donor cycle and after all bills are paid, the funds will be refunded to the Intended Parents.

International Donation Trust Account Deposit: \$5000.00

This is for ovum donor's travelling to international locations to the primary IVF clinic. These funds are placed in a trust account set up with Happy Beginnings, LLC and distributed accordingly for ovum donor cycle related expenses. These fees include psychological evaluation & MMPI analysis, genetic counseling (if applicable), hotel, meal allowances, mileage, taxis, rental car, airfare, flight protection insurance, baggage check fees, childcare, parking, tolls, FedEx, express mail, donor's attorney fee and additional expenses as necessary for the donor's participation in the ovum donor cycle. Itemized expense statements and all receipts (as applicable) will be provided within sixty (60) days following the completion of the egg retrieval procedure. If any funds are remaining in the expense account at the completion of the donor cycle and after all bills are paid, the funds will be refunded to the Intended Parents.

Additional Fees:

International Client Surcharge: \$500.00:

This is in addition to the agency service coordination fee, due to the increased time and effort that is generally required to facilitate a cycle with families residing outside of the United States.

Local Monitoring Fees: Vary

These fees apply if Intended Parents select a donor that does not reside local to the primary clinic and she will need to be monitored at a clinic local to her home. Local monitoring will include ultrasounds and blood work to assess the ovum donor's response to the cycle medications. We request that Intended Parents complete a credit card authorization for submission to the local monitoring clinic for billing and payment of the local monitoring costs.

Optional Shared Risk Policy:

The decision to purchase a shared risk policy must be made and paid in full upon the selection of an ovum donor.

- **Plan 1: \$500.00:**
This plan allows for a price reduction of 50% of the Agency Service Coordination fee for the matching and coordination of a second ovum donor cycle through Happy Beginnings, LLC with the same or another available ovum donor in Happy Beginnings, LLC's donor database in the event that the initial cycle is unsuccessful in achieving a pregnancy and live birth.
- **Plan 2: \$1000.00**
This plan allows for Intended Parent's to pay no Agency Service Coordination fee for the matching and coordination of a second ovum donor cycle through Happy Beginnings, LLC with the same or another available ovum donor in Happy Beginnings, LLC's donor database in the event that the initial cycle is unsuccessful in achieving a pregnancy and live birth.

Optional Pre-cycle Testing:

If you would like to have your ovum donor tested prior to her visiting your fertility clinic. We can assist with the following pre-cycle testing. All lab results will be provided to your IVF clinic promptly upon receipt in our office. We will provide recipients with copies of results upon request, however in order to maintain donor anonymity any reports provided to recipients will have donor's last name and contact information blacked out.

Ovarian Assessment Report: \$145.00

This test is a wonderful option for assessing how a first time ovum donor will respond to ovarian stimulation and may ease recipients concerns with selecting a first time donor. This test is performed on day 2, 3 or 4 of the donor's menstrual period following one month off of any oral contraceptives or hormonal birth control method. It assesses AMH, Inhibin B, FSH, LH and Estradiol levels. The ovarian assessment report will provide all lab values and an egg retrieval score. The Ovarian Assessment Report provides recipient couples with the most accurate assessment of a potential donor's ovulatory egg supply available through the use of a single blood sample. Ovulatory egg supply is the quantity of eggs a woman has available for collection through controlled ovarian stimulation, commonly referred to as an egg retrieval procedure. The report provides an Egg Retrieval Score (ERS) which is a unique index score that more accurately estimates the ovulatory egg supply by combining a donor's age with multiple ovary-related hormones. The results take approximately (6) business days once the specimen has reached the laboratory.

Cystic Fibrosis (47 mutations): \$102.00

The results take approximately (9) business days once the specimen has reached the laboratory.

Cystic Fibrosis (100 mutations): \$345.00

The results take approximately (28) days once the specimen has reached the laboratory.

Infectious Disease Testing: \$309.31

This fee includes processing of the entire following lab panel:

Hepatitis B Surface Antigen, Hepatitis B Core Total Antibody, Hepatitis C Virus Nucleic Acid Test, Hepatitis C Antibody, Human Immunodeficiency Virus (HIV) 1 & 2, RPR (Syphilis), Chlamydia & Gonorrhea Nucleic Acid Test TMA

The results take approximately (5) business days once the specimen reaches the laboratory.

Phlebotomist Fee: \$90.00

This fee will be assessed each time a phlebotomist visits the donor to draw specimens for the above listed *optional* tests. Multiple Tests may be drawn on one visit up to (4) vacutainers for the listed fee.

****Medical, Pharmaceutical & Lab Fees unless specified above will be paid directly to the clinic, pharmacy or lab. They are not figured into the above costs. Please refer to your clinic for detailed costs related to your donor's clinic, lab or medication costs.**
